CLARiTY VIEWER™
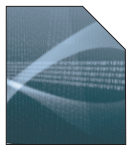

PACS MADE CLEAR

Clarity Viewer™ is an advanced radiology web viewer that can be configured to launch directly from an internet browser. The robust and clinically proven web viewer is part of the Clarity PACS system that is designed to optimize workflow in all healthcare environments. The web viewer has multi-monitor functionality, and is ideal for all modalities.

Clarity Viewer Features

RIS INTEGRATION

Optimize workflow with integrated patient registration, scheduling, and reporting

MULTIPLE VIEWING LICENSES

Expand the reach of data facility-wide for streamlined workflow and enhanced patient care

WEB-ENABLED CAPABILITY

Access your data anywhere in the world with our powerful web viewer

STRUCTURED REPORT WRITER

Easily create radiology reports utilizing customized templates

HANGING PROTOCOLS

Clarity PACS includes modality or practice-specific hanging protocols

EASY CD/DVD CREATOR

Quickly copy studies for patients and referring physicians

MULTI-MODALITY SUPPORT

Receive imaging data from CR, DR, ultrasound, MR, CT, and more

AUTOMATIC DICOM ROUTER

Rule-based auto-route from primary archive to external DICOM targets

GREY SCALE PRESENTATION STATES

Customize GSPS to your viewing preferences for optimized workflow

EASY HL7 INTEGRATION

Integrate with front office practice management systems like EMR, RIS, and others

IMAGING AND ANNOTATION TOOLS

Numerous tools available including: Cobb Angle, Center Line, Cine, and Smart Filtering
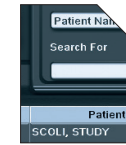

SMART WINDOW LEVEL

Adjust window levels with ease utilizing this intuitive, smart tool

DICOM IMPORTER

Clarity PACS can import JPEG, PDF or other DICOM objects

DYNAMIC WORKLIST AND VIEWER PREFERENCES

Customize Clarity PACS filtering options in addition to color schemes and fonts

SCALABLE ARCHIVING SOLUTIONS

Clarity PACS archive can be scaled up to tens of terabytes in RAID 5 configuration

REMOTE CONFIGURATION AND MONITORING

Clarity PACS can be configured and monitored remotely to ensure maximum uptime
